## CSSecurityTool

### Description:

This tool applies the necessary Carestream security policies per product to the local workstation. These security rules have been separated into 3 parts:

- Windows Defender: Add/Remove exclusion of executables and folders in Windows Defender
- Windows Firewall: Add/Remove ports in Windows Firewall
- Windows Security: Add rights to the current user in all Carestream folders

The list of Carestream components is available when starting the tool, enter HELP

*Note: Do not use Windows Defender and Windows Firewall parts if they are not activated on your Operating System. If the current user is not authorized to add Carestream security policies, please contact your administrator.*

### Workflow:

At startup, select the products installed on the local workstation:

```
Welcome to Carestream Security Tool
=====
This tool applies the necessary Carestream security policies per product to the local workstation.
Enter HELP to open Readme.txt file.
=====

0/ CSImaging7
1/ CSImaging8_v2
